

Pylint Code Quality Report

Target: backend/src/app

Category	Code	Location	Message
Convention (Naming)	C0103	api/deps.py:14	Constant name 'CredentialsError' doesn't conform to UPPER_CASE naming style
Refactor (Duplicate Code)	R0801	modules/translate/__init__.py:1	Similar lines in 2 files (admin/repository.py & members/repository.py)

Overall Code Score: 7.92/10

Command Used:

```
uv run --with pylint pylint src/app --output-format=text
```

Pylint Features Used:

- invalid-name (C0103) — PEP8 / naming convention checker
- duplicate-code (R0801) — design / similarity checker

Code & Output Detail

Convention (Naming) — C0103 (api/deps.py:14)

Code:

```
CredentialsError = HTTPException(  
    status_code=status.HTTP_401_UNAUTHORIZED,  
    detail="Could not validate credentials",  
    headers={"WWW-Authenticate": "Bearer"},  
)
```

Pylint Output:

```
src\app\api\deps.py:14:0: C0103: Constant name "CredentialsError" doesn't conform to UPPER_CASE naming style (invalid-name)
```

Refactor (Duplicate Code) — R0801 (modules/translate/__init__.py:1)

Code:

```
# modules/admin/repository.py [92:101]  
if search:  
    where["OR"] = [  
        {"fullName": {"contains": search, "mode": "insensitive"}},  
        {"email": {"contains": search, "mode": "insensitive"}},  
    ]  
  
# modules/members/repository.py [53:62] (same block repeated)  
if search:  
    where["OR"] = [  
        {"fullName": {"contains": search, "mode": "insensitive"}},  
        {"email": {"contains": search, "mode": "insensitive"}},  
    ]
```

Pylint Output:

```
src\app\modules\translate\__init__.py:1:0: R0801: Similar lines in 2 files  
==app.modules.admin.repository:[92:101]  
==app.modules.members.repository:[53:62]
```
